Thankful Hearts, Clear Steps — Key Notes (Nov 13, 2026)

Keep this next to you during the webinar. Plain words, the key lines, and what to say when a question gets personal.

The one-page version

Caregivers month class. Four parts: (1) the benefits map in plain words, (2) medication help — the check is free, (3) caring for the caregiver — budget basics, 2-1-1, respite, (4) the child's personal plan.

Say it exactly this way

SSI = based on need; income and resources count. SSDI = based on a work record. DAC = an adult child (disability began before 22) on a parent's record; a parent must be retired, disabled, or passed away.

The DAC warning

If a parent is about to file for retirement, the ORDER of filings can protect the child's Medicaid. Always say: talk to us before filing — timing matters. Never promise amounts or approvals; SSA decides.

Free help to name out loud

Medication check — always free. First talk — always free. 2-1-1 Texas — free local help line. Respite — a real break for caregivers.

If you get a hard question

Say: 'That one needs your family's private details. Book your free first talk and we will go through it together.' Then move on kindly.
